COVID-19 JAGRATHA
Covid Outbreak Management

1. Verification of quarantine facilities at home of Keralities who applied to return

User: LSGI RRT (LSGI Secretary) and Ward RRT (JPHN/JHI/Asha)

The details of domestic returnees data are made available to the LSGI Secretaries, RRTs and ward RRTs in their respective logins on receipt of application for domestic pass.

The people coming from red zone will be marked red and they should be referred for institutional quarantine.

The RRTs should verify facilities available for home quarantine for the returnees. The details to be verified are:
   a) Separate room with attached toilet facility
   b) Details of elderly persons and children at home
   c) Requirement of food or any other need

The RRTs should add remarks after verification through their respective login stating home quarantine facility is available or not available.

2. Counselling and facilitation of safe transportation arrangement to CCC for those who do not have facilities at home

User: LSGIs and District Control Rooms

The LSGI users will receive alerts (Portal Login and SMS) on pass issued and check post crossed for Domestic returnees and Pravasi list for international returnees on their arrival.

At the arrival points health screening shall be done and the following options are decided:

   a) Persons with no symptoms will be Home Quarantined
   b) Persons with no facility to HQ will be moved to Covid Care Centers (CCC)
   c) Persons with Symptoms to Covid Care Hospitals

The District Control Rooms shall arrange safe transportation facilities for people who shall be moved to CCCs.
LSGs shall provide counselling services to people on strict adherence to quarantine guidelines, being alert on health symptoms and timely reporting to health care providers.

3. Surveillance of quarantining and health monitoring

**User: Ward RRTS**

The ward RRTs should conduct Daily Health Monitoring and Surveillance of people who are home quarantined through House Visits and report on the Health Status of the people under quarantine. Medical Officers will report on the health status of those in Institutional Quarantine.

They can also add recommendation for quarantine release for those who are asymptomatic and have completed quarantine

The ward RRTs can also add people to surveillance if any person is missing in the domestic or pravasi list

4. Tele consultation (prescription and referral) and Mobile Medical Unit

**Users: DMO Control Room And MOs**

A team of doctors including DMO, DSO and DPM shall monitor the health status of the people with symptoms based on the reports of ward RRTs through their respective login.

The Medical Officers shall provide tele consultation through Online Video Calling Tools. They should give online prescriptions and also refer people to with symptoms hospitals.

Mobile Medical units shall be provided for health care services to home quarantined persons.

5. Testing and Contact Marking

**User: District Surveillance Officer**

The testing of suspected cases and reporting of positive cases is done by DSO.

DSO shall be responsible for tracking primary and secondary contacts of positive cases. This shall be done using the passengers list available in the portal.

6. Monitoring in CCCs and Hospitals
Users: Nodal officer (health), CCCs and hospitals

The nodal officer shall update the health status of persons in CCC and hospitals and also add details of discharge of patients.
